Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 and 27-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Kenyon(US 5,569,345).

In regard to claims 1-14 and 27-38 Kenyon discloses a garment pad 10 wherein the fleece fabric is a pad layer and an adhesive 11 on a bonding substrate liner which is heat sensitive adheres the pad to a garment. The adhesive becomes a liquid upon heating and is then cured when it cools. The web layer 11 is between the garment and the pad when adhered to the garment. The indentations about the edge of the pad as seen in figure 1 perform as relief gaps, relief cuts or apertures as broadly claimed. It is noted that any iron on patch in such a configuration reads on the claimed invention.

Also it is well known to glue with common household glue which is totally liquid and then cures with air to attach patches to garments as desired. The pad can be pulled off by hand and temporary or can remain permanently thereon. The fusible fabric is a double sided tape since the adhesive is on both sides. The material extends and curves in an arcuate shape following the outline in figure 1. Fusible bonding material is obtainable separately and can be used to adhere any fabric pad as desired. The pad of Kenyon is

placeable on any garment as a bra ad or shoulder pad as desired. Nothing precludes the Kenyon pad from being used as such. (See Kenyon, figure 1 and col. 2.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
